

PRODUCT

Inbox

The periodic signal from the Long-Acting Injectable ecosystem.

Every deal, read-out, approval and publication that moves the LAI field: filtered, structured, and delivered to your inbox.

— Filtered to the field, structured to scan.

General industry newsletters drown long-acting injectables in unrelated noise. Inbox is **filtered to the field** by the same editorial scope as the rest of Vectora, so every item is genuinely LAI. A structured digest of the ecosystem, 600 to 900 words, a five-minute read, delivered monthly or bi-weekly. You read it in one sitting and you already know what moved.

— What lands in your inbox

Each issue is organized by event type, so you scan straight to what matters to you:

-  **Deals & partnerships.** Licensing, M&A and collaborations across the LAI ecosystem.
-  **Clinical results.** Read-outs and trial milestones, with the source one click away.
-  **Regulatory approvals.** FDA, EMA and beyond, as they land.
-  **Financial moves.** Raises, grants and strategic funding in the field.
-  **Scientific publications.** The papers worth knowing about, not all of them.
-  **Strategic pivots.** Repositionings and portfolio shifts that change the competitive map.

— What your team does with it

Marketing

Keep continuous competitive awareness of your niche without spending hours scraping trade press and PubMed. A few minutes of structured signal you can take into your team syncs.

Business development

Spot every deal movement in your space (partnerships, M&A, licensing) with source links to follow up. No noise, no missed signal.

Team leadership

Forward one issue as your team's shared situational baseline for the week, so everyone works from the same view.

— Why you can trust what you read

- ✓ **Filtered by scope, not keywords** the noise is removed before you ever see it.
- ✓ **Every item links to its source** a headline is always one click from the original.
- ✓ **A custom lens on request** your molecules, competitors and technologies, resolved to real entities rather than fragile keyword matches.
- ✓ **Curated, not scraped** shaped by the analyst who defines the LAI scope, never an automated feed.

Delivered to your inbox. Monthly or bi-weekly, standard across the field or narrowed to your own watch scope.
